

NOTE: On May 7th 2019 City Council approved and authorized the Mayor to execute: The Third Amendment to Agreement No. A-7583 with Weck Laboratories, Inc. to:
1. Add the Special Districts Division to the Agreement's Scope of Services; and 2. Increase the value of the Agreement from \$900,000 to \$960,000 for ongoing services relating to the Channel Islands Harbor water quality issue.

The decision to take 55% of the funds needed from **WATERWAYS 1 (Mandalay)** was decided on by a simplistic GIS calculation of area. We do not believe this to be fair considering development agreements for Seabridge and Westport, the boat density in those developments and the access for those developments through the main channel and public benefit of the waterways in general. **The MAIN CHANNEL is PUBLIC ACCESS.**

NOW with the new 5th Street Development – we are still carrying the burden, the burden is increasing taking away funds from the SEAWALLS again!
